DEPRESSED HOUSING MARKET REQUIRES CHANGE

“BUILD YOUR OWN CUSTOM HOUSE” Make Instant Equity!

(February 2007 -- CINCINNATI, Ohio) Now a proven step-by-step process enables nearly anyone to build their own custom house for a lot less than using a traditional builder/general contractor. This can all be accomplished without lifting a hammer or driving a nail. The best part is that nearly instant equity is achieved by eliminating the middleman.

Introducing the UBuildPro Owner Builder Construction Process. UBuildPro is a home construction consulting firm that provides a proven methodology for average persons to build their own homes.

Until now, building a new custom house meant contacting a builder from the phone book or off a bill board somewhere, and allowing them to produce the house that you want. Often the home owner was left with a lot less house and a lot more cost than expected; while the contractor raked in huge profits.

NO BUILDING EXPERIENCE REQUIRED

UBuildPro provides the expertise of a builder to the average person in the form of on-site consulting. This allows them to build their own house themselves for thousands less! The result is a custom, well built house where the owner keeps the profit in the form of instant equity. Franchise opportunities are also available nationwide.
